What are the different types of circuit breakers?
Single-phase,double-phase,and three-phasecircuit breakers play vital roles in protecting electrical circuits. Single pole circuit breakers,commonly known as 1 pole breakers,are often used in residential,commercial and industrial applications.

What is a single pole circuit breaker?
Single pole circuit breakers,commonly known as 1 pole breakers,are often used in residential,commercial and industrial applications. They are designed to interrupt the power in one live wire and are suitable for protecting 230V AC circuits. Common applications: Lighting circuits,power outlets,small appliances

Which circuit breaker brand is best?
The market is filled with numerous circuit breaker brands, each with unique offerings and specifications. Australian electricians rely on trusted brands that meet local standards and provide reliable performance. A globally renowned brand, Clipsal's MAX9 range is the latest offering.

What is a three pole circuit breaker?
Three pole circuit breakers are predominantly used in larger homes,commercial or industrial settings where large amounts of power are required. These breakers interrupt power in three separate live wires,making them ideal for three-phase systems that demand a high power supply.
