Set the JAVA\_HOME Variable Windows 7 - Right click My Computer and select Properties &gt; Advanced  
Windows 8 - Go to Control Panel &gt; System &gt; Advanced System Settings Windows ...

@MetaByter I think it is more technically correct to phrase the question as "In a URL, should I encode the spaces using %20 or + in the query part of a URL?" because while the example ...

I am interested in knowing why "%20" is used as a space in URLs, particularly why %20 was used and why we even need it in the first place.

As the aforementioned RFC does not include any reference of encoding spaces as +, I guess using %20 is the way to go today. For example, "&quot;%20&quot;" is the percent-encoding for ...

Sometimes the spaces get URL encoded to the + sign, and some other times to %20. What is the difference and why should this happen?

Why do we need the concept keyword in C++20? Asked 2 years, 10 months ago Modified 2 years, 10 months ago Viewed 7k times

310 A bit of explaining as to what that %2520 is : The common space character is encoded as %20 as you
