2025 has been marked by significant global shifts, including increased geopolitical instability, the accelerating impact of AI and a changing labour market.

The January 2025 Chief Economists Outlook explores key trends in the global economy, including the latest outlook for growth, inflation, monetary and fiscal policy. It discusses the impact of US ...

Technological change, geoeconomic fragmentation, economic uncertainty, demographic shifts and the green transition - individually and in combination are among the ...

A comprehensive list of bidirectional (V2H and V2G) chargers in 2025, including their features and benefits.

Finally, emerging challenges in privacy, multi-energy coupling, and regulation are presented, emphasizing research directions to enhance grid resilience, economic viability, and ...

The National Equipment Manufacturers Association (NEMA)'s published a standard that defines the technical parameters to allow EV ...

Top international trade stories: Global trade set to decline in 2025, WTO says; Tariffs take centre stage at IMF-World Bank Spring Meetings; US stocks slide on renewed ...

Davos-Klosters, Switzerland, 23 January 2025 - US President Donald J. Trump outlined his strategy to bolster the US economy and "unleash" investment in a wide-ranging ...

In this article, we explore the rapid growth of the EV market, the current state of the charging landscape, and

2025 Model of Bidirectional Charging Container for Energy Storage in Power Stations

how Sigenenergy is at the forefront of revolutionizing energy storage ...

The expansion of bidirectional EV charging addresses several critical challenges in energy management. During peak demand periods, such as summer afternoons when air ...

Instead of just consuming electricity, electric vehicles can actively contribute to grid stability through bidirectional charging. They store surplus energy - from renewable sources, for ...

Given the right energy management solutions, bidirectional charging, or V2X, could add significant storage capacity for these ...

Given the right energy management solutions, bidirectional charging, or V2X, could add significant storage capacity for these systems. In addition, pairing a V2X system with ...

In 2025, the US and China engaged in a tit-for-tat trade dispute linked to tensions around merchandise trade. After negotiations, both sides have agreed to lower recent tariffs ...

Health and healthcare have changed dramatically in 2025, characterized by a downturn in global health financing and more of a shift to artificial intelligence (AI) and data ...

This paper introduces a novel testing environment that integrates unidirectional and bidirectional charging infrastructures into an existing hybrid energy storage system.
