Can you put AAA batteries inside solar lights?

No matter what AAA battery type you install, never store your solar lights or decorations with the batteries inside because that can lead to corrosion. It is easy to find AAA solar rechargeable batteries in any quantity you need on eBay. Are solar batteries and rechargeable batteries identical?

Are solar AAA batteries rechargeable?

Most solar AAA batteries are NiMH or NiCad that are readily available on eBay, but rechargeable types can be any of the following: Do solar lights have to be switched on to charge? People tend to leave the light's power switch on all the time for convenience, and the AAA battery will recharge when you do this.

Can you use a rechargeable battery for solar lights?

While there are different types of AAA rechargeable batteries, you should use only NiMH or NiCadin lights charged by the sun. Solar decorations will absorb the sun's energy through panels and store it in the battery.
