The exploration of energy-efficient and sustainable construction in Abuja reveals prominent barriers, including a lack of awareness, financial constraints, inadequate infrastructure, policy ...

This research focuses on the integration of passive energy-efficient design elements to foster the development of sustainable, cost-effective, and energy-efficient office buildings in Abuja, Nigeria.

Abuja, the capital city of Nigeria, has witnessed a significant surge in demand for commercial and industrial (C& I) energy storage systems.

Today, the U.S. Department of Energy's (DOE) Office of Clean Energy Demonstrations (OCED) issued a Notice of Intent (NOI) for up to \$100 million to fund pilot ...

Producing prefabricated structures that appeal to a wide variety of uses throughout the world, Karmod has now established a passport office in Nigeria's capital city Abuja to work with green ...

Abstract-- The study investigated energy consumption of office buildings in Abuja, Nigeria to elicit their status, impacts and performance on the city's energy supply.

The data were analysed by descriptive statistics and the results indicate that both the awareness and implementation levels of energy efficiency design strategies by the firms are high.

Furthermore, Architects should also consider the life-cycle perspective of the building, including embodied energy use and operational processes, to reduce carbon emissions in order to ...

Energy efficient buildings are buildings that consume less energy while also maintaining or improving the
