Where are wind power plants located?

Wind Power Plants: Europe leads the world in offshore and onshore wind power, with major projects in countries like Denmark, Germany, the UK, and Spain. Key Plants: Hornsea Project (UK): The largest offshore wind farm in the world, located in the North Sea. Gode Wind Farm (Germany): A major offshore wind project in the North Sea.

Where are offshore wind farms located in Europe?

The main EU producers of offshore wind energy are Germany, the Netherlands, Belgium and Denmark. Explore the Map of the Week to see where offshore wind farms are located. The Offshore Renewable Energy Strategy proposes to increase Europe's offshore wind capacity to at least 60 GW by 2030 and to 300 GW by 2050.

How many offshore wind turbines are there in Europe?

Europe now has a total installed offshore wind capacity of 30.3 GW (March 2023). This corresponds to more than 5,954 grid-connected wind turbines in 126 offshore wind farms across 13 countries. European Government pledges to add up to 150 GW of offshore wind in the next decade to comply with Europe's climate ambitions.

How many wind farms are there in Europe?

This product is a database of wind farms in Europe and includes 27,621 entries (in 40 countries). Its content represents 243,5 GW onshore and 502,6 GW offshore. Onshore market:
