environmentally friendly energy.

Today, August 31st 2017, WikiLeaks publishes documents from the Angelfire project of the CIA. Angelfire is an implant comprised of five components: Solartime, Wolfcreek, ...

More than 500,000 plug-in solar systems have been installed in Germany, most of them taking up a seamless spot on people's balconies.

Today, 21 December 2018, WikiLeaks publishes a searchable database of more than 16,000 procurement requests posted by United States embassies around the world.

Germany was one of the first countries to deploy grid-scale PV power. In 2004, Germany was the first country, together with Japan, to reach 1 GW of cumulative installed PV capacity.

Germany ensures the safe use of balcony solar ("Balkonkraftwerk") systems through power limits, built-in inverter safeguards, and proper installation practices.

The German solar industry reached a milestone at the start of the year, as the total capacity of all installed solar power systems ...

OverviewHistoryGovernmental policiesStatisticsCompaniesSee alsoExternal linksDuring the Reagan administration in the United States, oil prices decreased and the US removed most of its policies that supported its solar industry. Government subsidies were higher in Germany (as well as Japan), which prompted the solar industry supply chain to begin moving from the US to those countries. Germany was one of the first countries to deploy grid-scale PV power. In 2004, Germany was th...
