How can the ASEAN Power Grid facilitate investments in renewables?

To facilitate investments in renewables in ASEAN, it is critical to overcoming the barriers in renewable energy legislation, energy governance, and business environment. 28 Cooperation through the ASEAN Power Grid brings economic benefits to the region as a whole, and thus improves the affordability for energy transition.

Are small modular reactors a transitional energy solution in Southeast Asia?

As part of their energy transition efforts, many ASEAN countries view small modular reactors (SMRs), which have a lower electricity output, as a transitional energy solution. Indonesia has made the most progress, with 29 potential sites already confirmed. However, the overall development of SMRs in Southeast Asia still faces three major challenges.

Are energy transition investments accelerating in the ASEAN region?

Recent analysis of global energy transition investment trends reveals significant insights applicable to the ASEAN region. Despite geopolitical volatility and fluctuating interest rates, investment in energy transition assets is accelerating worldwide.

What is the ASEAN Centre for energy?

Development across ASEAN. To accommodate this, the ASEAN Centre for Energy, with support from IKI German and AFD, is developing an online platform designed to provide essential services such as third-party project valuation, performance insurance, project certification, and introductions to prequalified capital sources for energy.

As the ASEAN energy transition landscape continues to evolve, investors and industry professionals need expert guidance to navigate the complexities of this dynamic market.

The ASEAN Energy in 2025 Report provides key insights about ASEAN energy landscape and predictions in

2025.

Faced with energy transition objectives, the ten countries of the Association of Southeast Asian Nations (ASEAN) have technology options to decarbonize power sector. This ...

Southeast Asia is a developing region with a huge appetite for energy, and investors in China, South Korea, and Japan are now finding ...

Southeast Asia is a developing region with a huge appetite for energy, and investors in China, South Korea, and Japan are now finding promise in investing in renewable ...

ASEAN Energy in 2025 Key Takeaways from COP29 and Mobilising Climate Finance in ASEAN

As part of their energy transition efforts, many ASEAN countries view small modular reactors (SMRs), which have a lower ...

This report analyses pathways for the decarbonisation of ASEAN energy systems through 2060, using an optimal technology ...

This report explores how smart grids can accelerate ASEAN's clean energy ambitions by making renewable integration reliable, scalable, and supportive of industrial growth.

As part of their energy transition efforts, many ASEAN countries view small modular reactors (SMRs), which have a lower electricity output, as a transitional energy solution. ...

Meet the energy storage container - Southeast Asia's unsung hero in the energy transition. These modular powerhouses are reshaping how the region stores and distributes ...

As the ASEAN energy transition landscape continues to evolve, investors and industry professionals need expert guidance to navigate the ...

This report analyses pathways for the decarbonisation of ASEAN energy systems through 2060, using an optimal technology selection model developed by the Institute of ...

Database of over 550 individual technology designs and components across the energy system that contribute to achieving the goal of net-zero emissions. Includes information on the level of ...
