Why are solar panels so expensive in the Netherlands?

From transportation to installation, it all goes into the price. The solar panels may become cheaper, the cost of labor in the Netherlands increases dramatically. So you may be just as expensive," says importer Peter Desmet.

How much do solar panels cost in 2025?

What do solar panels cost in 2025? For a roof with 10 solar panels, you pay EUR 4408 to EUR 5714 on average in 2025, which you earn back within 4 to 6 years. What your exact investment and payback period are, depend on your wishes and what suits you best.

How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around EUR500 to EUR600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

How can we predict the cost of solar panels?

Predictions about the cost of solar panels are difficult. For example, the exchange rate of the euro is also influential, Desmet said. In addition, the European Commission decided Sept. 3 not to extend import tariffs on solar panels and cells from some Asian countries, including China.
