---

An E-House, also known as substation, is a prefabricated, modular outdoor enclosure designed to house electrical equipment. It typically contains low voltage (LV) and medium voltage (MV) ...

The mobile and fixed substations we produce in our modern facilities in Ankara, using the highest quality materials and advanced technology are ...

The container substation adopts a vertical air supply and exhaust structure system, and a high-density dust-proof device is added inside. The bottom of the box is covered with an anti-slip ...

A company called Ankara Solar Energy, located in Turkey and the largest in the country for making solar panels, has invented the first ...

The pre-fabricated building shelters the equipment from environmental influences, thus increasing substation availability and reliability. Fences can be omitted, which simplifies permitting, while ...

Ankara Solar Energy has developed a world-first in colored solar technology--dubbed "rainbow panels." Currently available in red, ...

The mobile and fixed substations we produce in our modern facilities in Ankara, using the highest quality materials and advanced technology are reliable and long-lasting.

The container substation adopts a vertical air supply and exhaust structure system, and a high-density dust-proof device is added inside. The bottom ...

Medium voltage containerised power substations for the solar, mining, tunnelling and construction industries. Containers substation are offered as standard or bespoke packages to suit the ...

Ankara Solar Energy has developed a world-first in colored solar technology--dubbed "rainbow panels." Currently available in red, green, and blue shades, ...

Medium voltage containerised power substations for the solar, mining, tunnelling and construction industries. Containers substation are offered ...

The Ankara Solar Energy Storage Power Station demonstrates how innovative energy storage can maximize solar potential while ensuring grid stability. As renewable energy becomes ...
