-----

This gem can generate an OpenAPI compatible schema from an API implemented using Apia. This gem is in the early phases of development and breaking changes may be introduced ...

GitHub is where people build software. More than 100 million people use GitHub to discover, fork, and contribute to over 420 million projects.

By following a strict approach to crafting your endpoints, Apia is able to generate a consistent schema describing every aspect of the API and thus can generate detailed and easy to use ...

Apia provides a utility that allows you to generate documentation for any API schema. The documentation is provided as a series of HTML files containing all aspects of the API. Here's ...

This generator handles complex response structures including polymorphic types, partial field selections, arrays of objects, and error response enums. For information about generating ...

Create detailed shipping container, storage container, and cargo container images with AI. Design industrial containers in seconds.

This is a middleman site that accepts a Apia schema JSON file and an, optional, config YAML file and generates documentation as appropriate.

The Schema Generator is responsible for converting Apia API definitions (Objects, ArgumentSets, Enums, and Polymorphs) into OpenAPI schema definitions. It generates both reusable ...

The `Apia::OpenApi::Helpers` module provides shared utility methods used across all OpenAPI generator components. These utilities handle type conversion, schema reference generation, ...
