-----  
Does Australia have 5G?

Australia's largest cities now enjoy extensive 5G coverage, especially across metropolitan areas. Cities like Sydney, Melbourne, Brisbane, Adelaide, Perth, and Canberra are at the forefront, with major telecom providers ensuring high-speed connectivity for millions of residents. This means faster internet for work, streaming, gaming, and more.

Who is the biggest 5G provider in Australia?

Australia's 5G landscape is shaped by Telstra, Optus, and Vodafone, each bringing distinct strengths to the table. Their competition is driving network expansion and improvements, giving consumers access to faster connections and broader coverage. Telstra leads the pack with the widest 5G coverage, reaching 87% of the Australian population.

Does Vodafone have a 5G network in Australia?

Vodafone have also shared plans for their 5G network to cover 85 per cent of the population in Sydney, Melbourne, Brisbane, Adelaide, Perth and Canberra by the end of 2021. Optus' network currently covers more than 1000 5G sites across Sydney, Melbourne, Brisbane, Perth, Adelaide and Canberra, and is accessible to more than 700,000 households.

Does Telstra have a 5G network?

Coverage Expansion: Over 200 cities and 3,000 suburbs now have 5G, with significant growth in rural and coastal areas. Older Networks: Telstra is shutting down its 3G network by August 2024 to boost 5G capacity. Government Support: \$14.3 million invested to accelerate 5G infrastructure.

Optus' network currently covers more than 1000 5G sites across Sydney, Melbourne, Brisbane, Perth, Adelaide and Canberra, and is accessible to more than 700,000 households.
