What are the new electrical safety regulations in Argentina?

On February 26, 2025, the Secretary of Industry & Commerce in Argentina published new resolutions-- Resolution 16/2025, Resolution 17/2025, and Resolution 25/2025 --that revoke the former Resolution 169/2018 and establish updated technical regulations to govern Electrical Safety Certification in Argentina.

How much electricity does Argentina need a year?

Faced with rising electricity demand (over 6% annually) and declining reserve margins, the government of Argentina is in the process of commissioning large projects, both in the generation and transmission sectors. To keep up with rising demand, it is estimated that about 1,000 MW of new generation capacity are needed each year.

Does a power plug come with a standard plug for Argentina?

The disclaimer must include a tag that indicates the product does not come with a standard power plug for Argentina, and that a certified grounded adapter is necessary to ensure safety. The following previous regulations are no longer in force as of February 26, 2025:

What type of electrical outlet does Argentina use?

Argentina uses Type I electrical outlets with standard voltage of 220V and 50Hz frequency. If your device plugs don't match Argentina's standards, we recommend purchasing suitable travel adapters in advance to ensure proper use. What power plug types are used in Argentina?
