How many solar panels are there in Australia?

According to Australia's Clean Energy Regulator, as at 15th October 2025, a total of 4.216 million solar power systems have been installed on Australian homes and small businesses. With an estimated number of 10.9 Million homes in Australia, this brings the total of all households in Australia that have solar panels to 38.68%.

How many Australian homes have rooftop solar panels?

As of June 2023, an estimated 3.4 million Australian homes and businesses proudly display rooftop solar panels, generating a staggering 13.3% of the country's total electricity. This figure represents a phenomenal 44% increase compared to 2020, highlighting the rapid adoption of distributed solar power (Clean Energy Regulator, 2023).

Is Australia a good place for solar energy?

Australia has an abundance of solar energy resource that is likely to be used for energy generation on a large scale. The combination of Australia's dry climate and latitude give it high benefits and potential for solar energy production.

How many solar panels will be installed in Australia in 2025?

Predominantly, these are solar panels installed on household rooftops. The Clean Energy Regulator forecasts a sixth straight year of 300,000+ installs in 2025, before an expected gradual decline in future years. The table below shows future projections for solar panel installs in Australia:

With 99 per cent of Australia's solar panels imported, there is only one manufacturer - Tindo Solar, an Adelaide-based company that ...
