Need reliable battery cooling plates? Discover certified manufacturers for electric vehicles and energy storage. Compare custom solutions and request quotes now!

High efficiency liquid cold plate designs enable rapid cooling to maximize rapid charging. Our production is geared to quickly manufacture high volumes of quality liquid cold plates, meeting continually ...

Lori custom liquid cooling plates are specifically engineered to meet the thermal management demands of modern electric vehicle battery packs. Crafted from premium aluminum with an innovative ...

Offering reliable performance, custom designs, and robust construction, our cold plates are engineered to solve demanding thermal challenges and extend the operational life of your equipment.

Understanding that one size does not fit all, so XD Thermal, we specialize in custom-designed liquid cold plates for applications requiring efficient cooling beyond what traditional heat exchangers can ...

Sogefi offers a full range of innovative battery cold plate solutions to meet the diverse needs of EV battery pack architectures. Laser welded extruded designs, and laser welded cold plates are ...

We have Cold Plates for Electric Vehicles of various sizes, for fast charging stations, and for renewable energy storage applications. The high sensitivity of Lithium Ion batteries towards temperature ...

Heat management in battery systems & similar applications is critical. Switzer is your premier partner in manufacturing cooling plates essential for hydrogen fuel cells & hydrogen generation.

ThermAvant Techonlogies developed and delivered a battery package for high-power-density Li-ion cells. Its cold plate core was manufactured from two individual Aluminum plates with CNC machined ...

ToneCooling designs and manufactures custom battery cold plates for EV battery packs, commercial vehicles, stationary storage and backup power systems. We support prismatic, pouch ...
