Rooftop solar panels are offering the promise of a more normal way of living in Lebanon amidst an unsteady electricity supply - for those who can afford it.

This dataset contains solar rooftop potential data (suitable rooftop area, installable capacity, estimated yearly electricity generation, and building type) at individual building structure level for a sample area ...

A number of solar arrays were reportedly involved in a second wave of electronic-device explosions across Lebanon yesterday, resulting in numerous injuries and deaths.

This article introduces Lebanon's first comprehensive footprint and solar rooftop potential maps using deep learning-based instance segmentation to extract buildings" footprints from satellite images. A ...

Rooftop PV systems explode in several parts of Beirut: A number of solar arrays were reportedly involved in a second wave of electronic-device explosions across Lebanon yesterday,...

In 2014, he designed the Beirut river solar snake, 10,000 sq m (107,000 sq ft) of panels installed along a 325m (1,070ft) stretch of the Beirut river. However, like all on-grid systems, it can ...

According to the state-run National News Agency, solar energy systems exploded in homes in several areas of Beirut and the south on Wednesday, but the reports remain unconfirmed.

Like tens of thousands of Lebanese people, the Mazloums have turned to solar power to generate reliable--and cost-effective--electricity in a country where the crisis-stricken state provides as...

The explosions occurred in various locations within Beirut, causing damage to the solar energy systems and
