Excellent Product Appearance and Performance Double-sided double-glass modules with symmetrical structural design and low risk of hidden cracks.

Trina Solar has started delivering a total of 187.5 megawatts of its Duomax double-glass modules to energy utility EnBW for the Weesow-Willmersdorf solar park near Berlin. Duomax modules ...

Double glass modules use an innovative design with glass on both sides, offering higher photovoltaic conversion efficiency and better environmental characteristics.

But what sets double glass solar panels apart from other types, and what are the advantages and disadvantages for electricians and solar professionals? In this blog post, we'll ...

Excellent product appearance and performance Two-sided double-glazed modules, symmetrical structural design, low risk of hidden cracks.

Generally, the front and back glass layers in these modules have the same thickness, contributing to their balanced structural integrity. This design not only enhances the ...

Generally, the front and back glass layers in these modules have the same thickness, contributing to their balanced structural ...

The glass-glass solar modules from Trina Solar combine outstanding technology with a particularly robust design. Thanks to the double-sided glass structure, they offer excellent ...

Double glass modules, due to the hermeticity of their structure, present less risk of PID. This phenomenon can

be avoided by the use of an appropriate encapsulation material and by ...

The new double-sided n-type Silk&#174; Nova Duetto high efficiency glass/glass panel with 132 half-cut cells, with a power range from 615 to 625 Watts, completes the FuturaSun model range.

Double-sided modules generate solar energy from both sides of the panel. While traditional panels with an opaque back coating are single-phase, the bifacial modules reveal both the ...
