What is the bulk energy storage program?

The Bulk Energy Storage Program will use an innovative Index Storage Credit incentive, as established in the Order and modeled in part on the Renewable Energy Certificate (REC) and Offshore Wind Renewable Energy Credit (OREC) utilized in other NYSERDA programs.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

Bulk Energy Storage Request for Proposals FAQs during the course of this Procurement cycle. To help you finalize your bids the Bulk Storage RFP Team will be hosting a webinar on February ...

Whether you're integrating renewables, stabilizing your operations, or seeking cleaner alternatives to diesel, Enerbond's containerized energy storage solutions are built to ...

Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and ...

On July 28, 2025, Governor Kathy Hochul announced the launch of New York State's first bulk energy storage competitive solicitation.

Our team of fabricators has worked with large solar park and wind farm operators, ensuring seamless integration of our modified containers into green energy projects.

Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy ...

Convert shipping containers into mobile power stations equipped with generators or solar panels. These can be deployed to remote areas or disaster-stricken regions to provide temporary ...

Request for Proposal: RG& E has developed a request for proposal (RFP) to procure a minimum of 10 MW of energy storage ...

Beginning Energy Level: The total amount of Energy (in MWh) stored by the Energy Storage Resource at the beginning of the Day-Ahead Market day or a Real-Time Market interval.

Whether you're integrating renewables, stabilizing your operations, or seeking cleaner alternatives to diesel, Enerbond's ...

The June 2024 Order formally proposes 6,000 megawatts (MW) of energy storage to be installed by 2030, and authorizes funds for NYSERDA to support 200 MW of new residential-scale ...

Request for Proposal: RG& E has developed a request for proposal (RFP) to procure a minimum of 10 MW of energy storage projects to be in service by December 31, 2030.

Our team of fabricators has worked with large solar park and wind farm operators, ensuring seamless integration of our modified ...

Governor Kathy Hochul today announced the launch of New York's first Bulk Energy Storage Request for Proposals (RFP), intended to procure one gigawatt (GW) of bulk ...
