Could Chinese solar power inverters destabilise power grids?

Solar panels are seen with a view of the neighbourhood and lower Manhattan in New York in this August 2022 file pic by Reuters. Western nations have raised a security alert after US experts found "rogue communication devices" in Chinese solar power inverters, amid concern they could be used to destabilise power grids.

Are Chinese solar power inverters causing rogue communication devices?

In a grimmer scenario, the vulnerabilities could be exploited to disrupt or damage power grids by creating an imbalance between power generation and demand. The recent revelation that Chinese-made solar power inverters are playing host to rogue communication devices has set off alarm bells around the globe.

Is Huawei still a global inverter company?

Huawei alone accounted for 29% of global shipments in 2022. While it exited the U.S. inverter market in 2019, it continues to supply other countries at scale. Philipp Schroeder, CEO of German solar developer 1Komma5, said his firm avoids Huawei products due to security risks.

Why did Huawei leave the US inverter market?

While Huawei decided to leave the US inverter market in 2019 - the year its 5G telecoms equipment was banned - it remains a dominant supplier elsewhere. Huawei declined to comment. In Europe, exercising control over just 3 to 4 gigawatts of energy could cause widespread disruption to electricity supplies, experts said.

While inverters are built to allow remote access for updates and maintenance, the utility companies that use them typically install firewalls to prevent direct communication back ...

Recent revelations concerning Chinese-manufactured solar power inverters have raised significant security concerns following the discovery of potentially harmful ...

In November, solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing ...

Recent findings indicate that these inverters may harbour undocumented communication devices, including cellular radios, which could create vulnerabilities by allowing ...

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy ...

Western nations have raised a security alert after US experts found "rogue communication devices" in Chinese solar power inverters, amid concern they could be used to ...

Western nations have raised a security alert after US experts found "rogue communication devices" in Chinese solar power inverters, ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden ...

Huawei accounted for 29% of the inverters that were sold in the world in 2022. While it left the U.S. market in 2019, its equipment is ...

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

Huawei accounted for 29% of the inverters that were sold in the world in 2022. While it left the U.S. market in 2019, its equipment is used in many places. European utilities ...

Recent investigations have uncovered the presence of undocumented communication devices within Chinese-manufactured solar power inverters and batteries, ...
