What is Eku Energy's big Canberra battery project?

With the capacity to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods, the project is a crucial component of the ACT government's Big Canberra Battery initiative. Eku Energy has established an innovative revenue swap arrangement with the ACT government, ensuring mutual benefits for both parties.

What is the Big Canberra battery project?

Installation is underway on behind-the-meter batteries at nine sites. The Big Canberra Battery project will deliver an ecosystem of batteries across the ACT to ensure that our electricity grid remains stable. The Big Canberra Battery project includes the installation of: installation of behind-the-meter batteries at nine government sites.

Why should we invest in the Big Canberra battery?

By investing in projects like the Big Canberra Battery, we're supporting economic growth, generating an ongoing supply of reliable revenue, creating local jobs, and attracting new investment in clean technology. "Our partnership with Eku Energy is a crucial step in the fight against climate change."

What is the Big Canberra battery transformer?

This stored energy will be used to support our electricity grid. The Big Canberra battery transformer was delivered to the Williamsdale site in early September 2025. The transformer ensures electricity stored in the battery is converted to the correct voltage to be safely supplied to the grid.

Explore the Williamsdale Battery Energy Storage System (BESS) project by Eku Energy, a 250MW/500MWh facility in Canberra. This project enhances energy security and reliability, ...

The Australian Capital Territory Government has signed a partnership agreement with Eku Energy to deliver a 250MW/500MWh battery energy storage system (BESS) facility ...

With the capacity to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods, the project is a crucial component of the ...

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital ...

The Williamsdale BESS is part of the ACT Government's Big Canberra Battery project and will play a critical role in supporting the ACT's transition to renewable energy and ...

Explore the Williamsdale Battery Energy Storage System (BESS) project by Eku Energy, a 250MW/500MWh facility in Canberra. This project ...

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in ...

With the capacity to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods, the ...

Weather-resistant battery energy storage systems designed for RVs, mobile homes, and outdoor installations. Silent operation, powerful performance, and long-lasting LiFePO4 technology.

The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two ...

Williamsdale BESS will deliver a key stage of the ACT Government's Big Canberra Battery ecosystem, helping the Territory reduce reliance on fossil fuels and achieve its 2045 net zero ...

The Williamsdale Battery Energy Storage System (BESS) will enhance energy security and reliability by storing renewable energy for use during peak demand.

The Williamsdale BESS is part of the ACT Government's Big Canberra Battery project and will play a critical role in supporting the ...

Scheduled to begin operations in 2026, the BESS will store enough renewable energy to power one-third of Canberra for two hours during peak demand, playing a pivotal ...

The Australian Capital Territory Government has signed a partnership agreement with Eku Energy to deliver a 250MW/500MWh ...
