Apart from three solar farms located within the ACT's borders, some 95% of its renewable power is generated by five wind farms located in suitable areas in the states of New ...

Expected to begin commercial operation in early 2024, it aims to achieve an installed capacity of 2.2 GW between now and 2025, focusing on the development of wind and ...

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of ...

As Australia accelerates its renewable energy transition, the Canberra 2024 Energy Storage Power Station Tender represents a pivotal moment for global energy storage providers. This ...

Expected to begin commercial operation in early 2024, it aims to achieve an installed capacity of 2.2 GW between now and 2025, ...

Ekus Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ...

Designed to tackle the intermittency of wind and solar power, this pumped hydro initiative could store enough electricity to power 200,000 homes for 8 hours--equivalent to keeping Sydney ...

The objective was to expand renewable energy storage and future-proof Canberra's energy supply. The project aims to deliver the next stage of ...

aims to deliver the next stage of the Big Canberra Battery by establishing a ...

Energy Storage is critical for ACT's 100% renewables and net-zero target. Helps to put downward pressure on electricity price paid by ACT consumers. Reduces the need for electricity network ...

Ekus Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ambitious climate goals.

Canberra is taking bold steps towards a sustainable future, with recent initiatives set to transform how we generate, store, and use energy. Here's what you, as a Canberra ...

At its core is the Williamsdale BESS, a 250 MW powerhouse designed to bolster the reliability of Canberra's energy supply. By storing surplus electricity generated from renewable sources like ...

Apart from three solar farms located within the ACT's borders, some 95% of its renewable power is generated by five wind farms located ...
