----

I designed this capacitive moisture sensor, I"m not sure if it will work. I"m posting it here to see if anyone can find anything I should fix before I order the PCB (I"m a student, I ...

This capacitive reactance can be compensated for by introducing a lumped-inductive reactance, as shown in view A. Similarly, if the antenna is too long for the ...

Hi I am newbie here! I understand why capacitive reactance reduces inductive reactance mathematically, having a result of zero at resonant frequency. But how to physically ...

I am working on a power supply design but I suppose this is a general question that most people will be able to answer. I am in need of purchasing a load switch from a company ...

Hello there, I"d like to activate a touch switch electronically. It"s a capacitive type switch. There can be no wires connected to the capacitive switch, it must come from ...

What is the capacitive load and how can capacitive load be simulated? I want to monitor the current and voltages in the simulation by powering a capacitive load from the ...

FTC334F is a professional capacitive touch button processing chip. It adopts the latest high-precision digital capacitance measurement technology and can prevent various ...

I need a way to trigger a capacitive touch screen device (like a tablet) using an isolated system without touching it. For example a kid places a small gadget on a tablet screen ...

Working with resonant circuits and when Xl = Xc the circuit is purely resistive. What I am having a problem

picturing is what happens at f1 and f2. One is capacitive f1 and ...

Hello All, I am trying to build a simple capacitive builder. Part of the circuit is shown as below The gate drive gets signal from a microcontroller. The pulse time can be varied ...
