Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What is a shipping container generator?

Housed within standard shipping containers, these generators offer a seamless integration of the generator set and its associated equipment, providing a robust solution that combines aesthetics with functionality.

How many generators can be used in a container genset?

The container gensets can be powered by engines of following manufacturers: The container built-in control panels are based on the intended use, e.g. manual/stand alone operation, emergency/standby or parallel operation. In parallel mode (GenSet-GenSet), up to 32 generators can be used as 'Power-Plant'.

What is included in a container generator?

The container generators are fully operational supplied, including air-intake, exhaust system and silenced muffler, tank, control panel and accessories such as lighting and fire extinguishers. Apart from the preparations for the load connection no further construction work at site is necessary.

Our generators can be equipped with explosion-proof switches, lights, and cabinets, along with workbenches and rope hooks. ...
