It said the government will be deploying centralised energy storage systems and at the same time launched a public consultation into how best to direct funding to support renewable energy sources that can be combined, or ...

After much anticipation, the Cyprus Parliament unanimously passed a pivotal law enabling the storage of electrical energy. This significant move, driven by persistent efforts from Energy Minister Giorgos Papanastasiou, brings Cyprus ...

In the latest development, Cyprus is trialing a new large scale, long duration compressed air energy storage system that leverages the water pressure of the ocean for maximum effectiveness.

Energy storage cabinet containers might just hold the key to unlocking this renewable potential. But how did we get here, and what makes these systems particularly suited for this Mediterranean territory?

Cyprus curtails over 29% of solar energy due to grid constraints. This post explores smart storage, policy fixes, and tech solutions to reclaim wasted clean power.

In a sun-drenched Mediterranean win for clean energy, Cyprus deployed a 12MWh Island BESS Container Microgrid across three islands in 2025 (Eurelectric). This solar-storage hybrid delivered a ...

The scheme has a competitive character, offering EUR 35 million (\$36 million) for the purchase and installation of energy storage units alongside existing solar PV, wind and biomass power plants.

Technological advancements are dramatically improving solar storage container performance while reducing

costs. Next-generation thermal management systems maintain optimal operating ...

The initiative aims to reduce electricity costs for citizens whilst supporting the country's green energy transition. Benefits include reduced curtailment of renewable energy production and ...

On Thursday, the House of representatives unanimously passed a bill that reforms the regulation of the electricity sector, paving the way for cheaper and cleaner energy.

The scheme has a competitive character, offering EUR 35 million (\$36 million) for the purchase and installation of energy storage units alongside existing solar PV, wind and biomass ...
