Is Ukraine making a 'strategic shift' toward Distributed Energy Resources?

Ukraine is making a "strategic shift" toward distributed energy resources. In the two and a half years since Russia invaded Ukraine, Ukraine's energy system has been a regular target, with attacks on thermal and hydro assets, substations, and solar units.

Why did Ukraine face an infrastructure crisis in 2024?

In 2024, energy in Ukraine faced an infrastructure crisis unprecedented in its national history as a result of sustained Russian military attacks on its power generation facilities and transmission networks, in addition to disconnection from the Russian and Belarusian energy grid.

Why is China opportunistic in Ukraine?

China's opportunistic economic involvement in Ukraine predates Russia's deeper invasion of the country in 2022 and has evolved in response to the last three years of full-scale war. Ukraine joined China's Belt and Road Initiative in 2017, and in 2019 China surpassed Russia as Ukraine's largest trading partner.

Why did China become a major importer of Ukraine?

China became a top importer of Ukrainian foodstuffs, energy commodities, and armaments while pioneering investments and construction projects in Ukrainian infrastructure, such as port terminals, transit, and "clean" energy.

Ukraine is making a "strategic shift" toward distributed energy resources. In the two and a half years since Russia invaded Ukraine, ...

In 2024, energy in Ukraine faced an infrastructure crisis unprecedented in its national history as a result of sustained Russian military attacks on its power generation facilities and transmission networks, in addition to disconnection from the Russian and Belarusian energy grid.
