How many 5G sites are there in Spain?

By mid-2024, around 92% of Spain's population was covered by 5G, with Movistar alone deploying over 10,900 5G sites by late 2023. An additional EUR1 billion was invested in 2023-24 to bring 5G to 2 million residents in towns under 10,000 people. The national target is 100% coverage at 100 Mbps by 2025 under the Spain Digital Agenda.

How will 5G be implemented in Spain?

Therefore, Spain has defined a roadmap aimed at the implementation of 5G throughout the national territory, as well as the restructuring of certain frequency bands. Now, the 26 GHz band will be allocated, to offer wireless broadband electronic communications services with 5G technology requiring high capacity.

What percentage of Spaniards have 5G?

Notably, about 74% of the population had 5G in mid-band (3.4-3.8 GHz) coverage by mid-2024, indicating that three-quarters of Spaniards could access the highest-capacity 5G service, while the rest mainly have 5G via low-band (which, while offering broader coverage, delivers more modest speed improvements).

Does Spain have 5G and fiber optic coverage?

Visual Core & Networks & Connectivity & 5G and fiber optic coverage in Spain: current situation, progress, and comparison of offers 5G and fiber optic coverage in Spain is approaching universality, reaching over 90% of households, with clear progress also in rural areas.
