-----  
How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

How many 5G base stations are there in 2024?

In 2024, the number of 5G base stations in China exceeded 4.1 million. In India, 469,000 5G base stations have been deployed, while the 27 EU countries together have a total of 460,000 5G base stations. While 5G deployment is advancing rapidly in other parts of the world, Europe is lagging behind.

Are Chinese telecom giants a threat to Europe's 5G networks?

As Chinese telecom giants weave themselves into Europe's 5G networks, undersea cables, and smart infrastructure, they bring not only speed and savings--but strategic risk.

What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

The rollout and expansion of 5G networks across Europe have been advancing significantly in recent times. Several operators have ...
