The Dominican Republic's 300MW project demonstrates how energy storage can transform island economies - reducing fuel dependence while enabling renewable growth.

EcoDirect designs and supplies solar + battery projects in the Dominican Republic. Our team has the tools and experience to get your next project designed and delivered.

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

For years, numerous solar renewable energy parks have been installed. This is the first time that battery energy storage is part of a renewable energy park tender. Battery energy ...

In cooperation with the start-up Africa GreenTec, TESVOLT is supplying lithium storage systems for 50 solar containers with a total capacity of 3 megawatt hours (MWh), enabling a reliable ...

Your path to success in Dominican starts with Highjoule. At Highjoule, we are committed to supporting our agents in Dominican with reliable energy storage solutions that promote ...

Container Energy Storage System (CESS) is a modular and scalable energy storage solution that utilizes containerized lithium-ion batteries to store and supply electricity.

We make energy storage and optimization solutions built on lithium-ion battery technology for businesses within telecom, commercial, industrial, and residential facilities across the world.

New materials developed here are solving the region's biggest energy puzzle: how to store solar and wind
