What are emergency lighting inverters?

The inverters allow designated lighting fixtures (loads) to serve as code-compliant emergency lighting sources during failure of normal AC power. Emergency lighting inverters work with a variety of lighting systems (e.g., LED, fluorescent) and lamp types (e.g., LED strip system, Edison-based, fluorescent linear, CFL).

What is a lighting inverter?

A lighting inverter is a device that converts DC battery power to standard AC voltage to provide backup for lighting systems in an emergency. It can also help protect against 'brownouts' or other voltage drops. What is an emergency lighting inverter? It provides power to your emergency lamps and fixtures in a power loss.

What is an emergency lighting backup inverter?

An emergency lighting backup inverter is a device that converts DC battery power to standard AC voltage to provide backup for various lighting systems, including fluorescent and LED lights, in an emergency.

Is an emergency lighting inverter UL924 listed?

When selecting an emergency lighting inverter, it is mandatory that the system is UL924 listed. UL924 ensures that the battery backup system has passed several critical discharge and recharge tests which are required for life safety.

In order to supply the demand, Controlled Power Company has developed an entire line of no-break, power conditioning, NFPA and life safety code compliant, emergency lighting inverters.

Acuity Brands provides a comprehensive selection of emergency lighting inverters and related accessories.

Expert assistance from Technical Consultants assist in the selection process of your next Inverter System. Our team is available for Technical Review of specifications, Sizing assistance, ...
