What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. - The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE's investment in future planning of energy storage research, development, demonstration, and deployment projects.

How does ESMAP support developing countries in deploying energy storage?

ESMAP is supporting developing countries in deploying energy storage through providing access to concessional finance, technical assistance, and addressing key knowledge gaps through an international Energy Storage Partnership (ESP).

What is Doe's strategic investment in energy storage?

DOE's strategic investment in energy storage aims to ensure that all Americans have access to energy storage innovations to enable resilient, reliable, secure, and affordable electricity systems and supplies.

Why is energy storage important?

Energy storage allows for the increased use of wind and solar power, which can not only increase access to power in developing countries, but also increase the resilience of energy systems, improve grid reliability, stability, and power quality, essential to promoting the productive uses of energy.

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically ...

In April of 2025, the energy storage industry announced a commitment to invest \$100 billion into building and buying American-made batteries. This commitment is expected to generate more ...
