With renewable energy sources like solar and wind becoming the Meryl Streep of climate solutions (always nominated, finally winning), strategic partnerships in energy storage are no longer ...

This article will make an analysis of industrial chain issues in the energy storage system integration industry, it will gradually become the mainstream of new energy storage.

The Solar Energy Industries Association (SEIA) published a white paper outlining the industry group's vision for U.S. energy storage, setting a target to install 10 million distributed...

Coalition members are leading the charge in deploying energy storage infrastructure, manufacturing grid batteries in factories across the United States, refining and producing battery materials, and investing ...

As the year draws to a close, the new energy industry track continues to heat up, with major projects intensively signing contracts and kicking off production across multiple regions in ...

In April 2025, the energy storage industry announced a commitment to invest \$100 billion into building and buying American-made batteries. This commitment is expected to generate more than 350,000 ...

System integrator HyperStrong has announced the signing of a Strategic Cooperation Agreement with CATL, the world's largest lithium-ion battery OEM. The cooperation period will run ...

The world's first energy storage cabinet, EnergyArk, combines low-carbon construction materials and new energy sources, with a strength surpassing Taipei 101 and fire-resistant and heat ...

The DOE energy supply chain strategy report summarizes the key elements of the energy supply chain as well

as the strategies the U.S. Government is starting to employ to address them. Additionally, it ...

The application scenarios of the energy storage industry can be mainly divided into three categories: power supply side, grid side and user side: energy storage installed on ...
