What is a structural thermal break?

Farrat Structural Thermal Breaks are the most efficient & reliable way to thermally separate structural connections and prevent heat loss in the building envelope. Proven to improve building performance and reduce energy loss throughout the lifetime of the building.

What is armatherm FRR structural thermal break material?

Armatherm(TM) FRR structural thermal break material provides a combination of low thermal conductivity and high compressive strength and has been used in hundreds of structural steel framing connections transferring load in moment and shear conditions. Armatherm(TM) FRR thermal break material can support high loads and has great mechanical properties.

Where are Farrat structural thermal breaks used?

Farrat Structural Thermal Breaks are used in over 15,000 projects worldwide and growing across different sectors. We would like to become your trusted supplier here in Ireland.

What are the benefits of a thermal break?

The primary benefit of this is that the thermal break will maintain full structural integrity with very limited creep under load while reducing heat loss.

Thermal automotive circuit breakers are used to protect electrical networks in most types of vehicles, including cars, vans, buses, and boats. Shop our range of Thermal Magnetic Circuit ...

Our family of thermal break products can help minimise energy loss, as well as significantly improving envelope performance. Our engineers are experts in specifying thermal breaks in ...
