The mechanism to engage the flywheel is faulty, probably the solenoid that activates it is either faulty (it moves its internal parts to make contact and so the motor spins, ...

Belle gnocche straniere (nazionalità&#224; non italiana) più&#249; o meno famose: foto e commenti

A dual mass flywheel (or DMF) is a flywheel that is split into two halves (hence the name...), with a spring or springs between them to dampen out sudden changes in torque and ...

No grinding,no clicking, just spinning freely, but wouldn't engage flywheel. Hot another starter figuring this one was shot, preventing it from engaging the flywheel, and in the ...

How do I stop the flywheel from spinning while torquing the bolts? My repair manual says I should buy a

special tool to do it, but I don't want to buy an expensive tool that ...

This previous question explains what a flywheel does and why it is needed. That explanation means that the flywheel needs a certain amount of mass to do its job. However, ...
