Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

What does Georgia Power do?

"At Georgia Power, we work with the Georgia PSC and many other stakeholders to make the investments required for a reliable and resilient power grid, integrating new technologies to better serve our customers today and as Georgia grows," said Rick Anderson, senior vice president and senior production officer for Georgia Power.

What is a battery energy storage system?

Provide a charging infrastructure for electric vehicles (EVs) with a Battery Energy Storage System. Improve energy resilience with Sol-Ark's Battery Energy Storage Systems (BESS). A BESS will provide backup power, smooth out fluctuations in renewable energy generation and reduce dependence on the main grid.

Does Georgia Power support Customer-Sited solar?

Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The 2025 IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot.

If Georgia's energy storage sector were a peach cobbler, it'd be bubbling with innovation instead of fruit. The state has quietly become a hotspot for energy storage ...

Stryten Energy, headquartered in Georgia, offers advanced lead, lithium, vanadium redox flow or a hybrid of battery chemistries. With this range of technologies available, customers receive ...
