How many MW of energy storage does Georgia Power need?

Georgia Power is seeking 500 MW of energy storage that can discharge for at least two hours. The energy storage can be standalone, or with a new or existing renewable resource. Ascend Analytics is administering the request for proposal (RFP) on behalf of Georgia Power.

Does Georgia Power have a battery energy storage system?

Georgia Power is already operating battery energy storage systems and has plans for more. The utility's 65-MW Mossy Branch BESS is located in Talbot County and began commercial operation in November 2024. Another 765 MW was authorized by the Georgia PSC and is projected to enter commercial operation in 2026, the utility said.

Will Georgia Power add storage to solar projects?

In its IRP, Georgia Power detailed adding storage to solar projects, saying that its adoption of solar+storage versus solar-only generation at sites is currently at 17%. Georgia Power first examined energy storage in its 2019 IRP, with approval to build, own and operate 80 MW of BESS at the time.

How much energy does Georgia Power use?

In July Georgia Power requested certification from the PSC for 9.9 GW of new generation resources, 3 GW of which were for energy storage. Over the next five to six years, the utility projects approximately 8.2 GW of electrical load growth, up more than 2.2 GW overall when compared to projections in its 2023 IRP Update.

Georgia Power launches a 500 MW tender for battery energy storage systems, driving major growth in renewables integration and grid reliability.

Committed to delivering clean, safe, reliable and affordable energy, Georgia Power maintains a diverse, innovative generation mix that includes nuclear, coal and natural ...

Georgia Power has requested certification from the Georgia Public Service Commission (PSC) for 9,900MW of new generation resources, including more than 3GW of ...

Georgia Power is seeking 500 MW of energy storage with the ability to discharge for at least two hours, either standalone or with associated renewable resources, the utility ...

Georgia Power is seeking 500 MW of energy storage that can discharge for at least two hours. The energy storage can be standalone, ...

Georgia Power has requested state energy regulators to approve nearly 10,000 megawatts of new energy resources, including a ...

Georgia Power has requested certification from the Georgia Public Service Commission (PSC) for 9,900MW of new generation ...

Georgia Power is seeking 500 MW of energy storage with a minimum of 500 MWh to support its renewables expansion, as part of its 2022 Integrated Resource Plan (IRP).

Approved by the Georgia Public Service Commission (PSC) as a part of the company's 2022 Integrated Resource Plan (IRP), this RFP provides a competitive solicitation ...

Georgia Power is tendering for 500 MW of energy storage project capacity with the aim of bringing the sites online before 2032. The ...

Georgia Power is tendering for 500 MW of energy storage project capacity with the aim of bringing the sites online before 2032. The energy storage can be standalone or with a ...

Georgia Power is seeking 500 MW of energy storage that can discharge for at least two hours. The energy storage can be standalone, or with a new or existing renewable ...

These significant savings for Georgia Power customers reinforces the company's commitment to delivering affordable energy for customers in the face of projected ...

Georgia Power has requested state energy regulators to approve nearly 10,000 megawatts of new energy resources, including a mix of gas turbines, solar, and battery ...
