The DOE Global Energy Storage Database provides research-grade information on grid-connected energy storage projects and relevant state ...

The report provides a current market overview of the global energy storage industry, including recent trends, drivers, challenges, and outlook in major countries across Europe and the ...

The following resources provide information on a broad range of storage technologies.

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

Find the latest statistics and facts on energy storage.

Utility-scale PV led global installations, but distributed PV remained strong in key markets including Germany, Turkey, and Brazil. Curtailment is ...

In the five-year period from 2018 to 2023, global renewable energy capacity expanded at a compound annual growth rate (CAGR) of 10.4%. If this historical trend were to continue, it ...

The DOE Global Energy Storage Database provides research-grade information on grid-connected energy storage projects and relevant state and federal policies. All data can be ...

Utility-scale PV led global installations, but distributed PV remained strong in key markets including Germany, Turkey, and Brazil. Curtailment is increasingly prevalent in high ...

At the link below you can find a detailed description of the structure of our data pipeline, including links to all

the code used to prepare data across Our World in Data.

To facilitate the rapid uptake of new solar PV and wind, global energy storage capacity increases to 1 500 GW by 2030 in the NZE Scenario, which meets the Paris ...

It covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, ...

It covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities ...
