Any electrical power grid must match electricity production to consumption, both of which vary significantly over time. Energy derived from solar and wind sources varies with the weather on time scales ranging from less than a second to weeks or longer. Nuclear power is less flexible than fossil fuels, meaning it cannot easily match the variations in demand. Thus, low-carbon electricity without storage presents special challenges to electric utilities.

They aren't thugs or gang leaders. War Room tells the truth about society by showing the reverse of that stereotype. Racial tension is dangerous and people are dying and a lot of us want to ...
