---

Guyana""s Public Utility (GPL) has initiated a tender for three utility-scale solar PV and battery storage projects, totaling 15 MWp of solar capacity and 22 MWh of storage.

The last 12-18 months have seen the emergence of more China-based battery energy storage system (BESS) manufacturers and system integrators on the global stage, all selling 20-foot, ...

The project is widely viewed as transformational for Guyana, which currently relies heavily on imported HFO to meet its electricity needs. The switch to domestically sourced ...

The falling costs of grid-scale battery energy storage system (BESS) technology, a topic that has been much discussed recently on Energy-Storage news, will support growth, BNEF said.

The BESS forms a critical part of the power plant"s emergency support system and is engineered to ensure uninterrupted energy delivery ...

Designed to respond instantaneously, BESS provides "critical" backup power to protect the integrity of the electrical grid and maintain operational stability in the event of ...

See full statement from LNDCH4 Guyana LNDCH4 Guyana is pleased to announce the arrival of the Backup Battery Storage System (BESS) which landed at the John ...

As Guyana positions itself as a Caribbean energy leader, one thing"clear: The smart energy storage battery isn"t just another gadget - it"the cornerstone of a grid that"as ...

Despite setbacks, LNDCH4 reports construction continues around the clock at international standards. The project represents a transformational shift for Guyana, which ...

June 23, 2022: Guyana is to develop eight utility-scale solar and battery storage projects in the South American country with investment financing worth around \$83 million, the Inter ...

The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure uninterrupted energy delivery in the event of turbine failure. The ...
