How many 5G networks are there in 2025?

The build-out of 5G continues, with around 360 networks launched worldwide. Global 5G population coverage is expected to reach 60 percent by the end of 2025, providing 5G coverage to an additional 400 million people during the year. Outside mainland China, it is projected to increase from 50 percent in 2025 to about 85 percent in 2031.

How many 5G base stations will India have by 2025?

The country has set an ambitious goal of deploying over 500,000 5G base stations by 2025, a target driven by telecom giants like Reliance Jio and Bharti Airtel. The Indian government has actively supported 5G expansion, conducting large-scale spectrum auctions and offering incentives for infrastructure development.

What is 5G mid-band coverage in 2025?

5G mid-band coverage is projected to increase from 40 percent to 45 percent during 2025. Global 5G population coverage outside of mainland China is predicted to reach around 85 percent at the end of 2031. There are currently 841 4G networks deployed worldwide, with 347 upgraded to LTE-Advanced and 448 LTE devices supporting Cat-16.

Which countries will have the lowest 5G coverage in 2025?

Africa is expected to have the lowest total and mid-band 5G coverage, reaching about 10 percent by the end of 2025. The Middle East shows somewhat higher levels, with a total coverage of around 25 percent and mid-band coverage of about 20 percent expected.

These data can be visualized by applying filters by technology (no coverage, 2G, 3G, 4G, 4G+, 5G) over a configurable period (only the last 2 months for example). It's a great tool to track ...
