Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Are Chinese solar inverters hidden inside solar panels?

But the implications were massive. This was just one of several similar discoveries over the past year. According to reports from sources close to ongoing investigations, experts examining imported solar inverters and battery systems from Chinese manufacturers have quietly found more of these hidden Chinese devices embedded inside.

Is Chinese inverter equipment undocumented?

Reuters analysts identified that the undocumented equipment has been found in multiple Chinese inverter models over the past nine months, with similar discoveries in battery storage systems from various Chinese manufacturers.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Reuters analysts identified that the undocumented equipment has been found in multiple Chinese inverter models over the past nine months, with similar discoveries in battery ...

It's not yet clear how many of these communication devices were found, nor the nature of the devices

themselves - and the intent behind the planting of these is unknown.

Evidence of just how real this risk might be surfaced in late 2024, when a number of inverters across multiple countries were reportedly disabled remotely from China. The ...

Evidence of just how real this risk might be surfaced in late 2024, when a number of inverters across multiple countries were ...

Reuters analysts identified that the undocumented equipment has been found in multiple Chinese inverter models over the past nine ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after ...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...

U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy ...

Investigations have revealed that certain Chinese-made solar inverters and batteries contain undocumented communication modules, including ...

It's not yet clear how many of these communication devices were found, nor the nature of the devices themselves - and the intent ...

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say how many they had found in total. The ...

Investigations have revealed that certain Chinese-made solar inverters and batteries contain undocumented communication modules, including cellular-like mechanisms.

The DOE has not publicly disclosed which manufacturers produced the compromised inverters, nor how many devices have been ...

U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication ...
