How much does a solar system cost?

Here's what you need to know about the cost of going solar. Cost per Watt: Solar panel systems are generally priced based on their energy output in watts. In 2024, the average cost for a solar panel installation is about \$2.50 to \$3.50 per watt. For example, a 6 kW system might cost between \$15,000 and \$21,000 before any tax credits or incentives.

How much do Tesla Solar panels cost?

Tesla solar panels are known for their sleek design and high efficiency. The cost typically ranges from \$10,000 to \$25,000, depending on system size and location. Tesla also offers Powerwall storage options. Explore reviews from real homeowners on Tesla's services. SunPower provides some of the most efficient solar panels on the market.

How much does a solar panel installation cost?

Solar panel installation costs vary by the installation company and project scope, making it challenging to pinpoint exactly how much you'll pay to have a pro install your solar panels. However, the U.S. Department of Energy estimates that installers add around \$2.25 per watt to the cost of a solar panel installation.

How much does a solar battery cost?

A whole-home solar battery costs between \$1,700 and \$9,000, or around \$3,900 on average for 10 kilowatt-hours (kWh) of storage for materials. Labor can vary by size, location and complexity. Solar batteries store excess solar power in case it's needed, and this battery size can power most essentials in a home during an outage for several hours.
