Despite the thinness of the glass, the 1.1mm and 0.8mm ultra-thin glass is strengthened to provide high impact resistance and mechanical strength, which can withstand ...

adv. in a thin manner. sparsely; not densely. so as to produce something thin: Slice the ham thin. v.t. to make thin or thinner (often fol. by down, out, etc.). v.i. to become thin or thinner; become ...

It is understood that 1.5mm is currently the thinnest photovoltaic glass that can be mass-produced. Due to the excellent transparency and PID-free ...

thin, slender, slim, slight, tenuous mean not thick, broad, abundant, or dense. thin implies comparatively little extension between surfaces or in diameter, or it may imply lack of ...

Enhancing the strength and transmittance of ultra-thin rolled photovoltaic glass to improve glass performance and increase ...

The crowd that comes to Thin is usually very eclectic and diverse and that's very appealing. They always bring in great house/electronica/hip hop/mashup DJ's to spin tunes that are applicable ...

thin (third-person singular simple present thins, present participle thinning, simple past and past participle thinned) (transitive) To make thin or thinner. quotations

Comparing key material properties, ultra-thin glass typically ranges from 0.3 to 0.5 mm in thickness with increased mechanical flexibility, while low-iron glass usually measures 2 to 4 ...

Something thin is narrow or not very thick. If you wear thin socks on a cold winter day, your toes might start to feel numb. Thin can describe something that is narrow and slender, like a hair or ...

Despite the thinness of the glass, the 1.1mm and 0.8mm ultra-thin glass is strengthened to provide high impact resistance and ...

Ultra-thin solar cells offer several advantages over conventional silicon solar cells. The most obvious one is their thickness. ...

It is understood that 1.5mm is currently the thinnest photovoltaic glass that can be mass-produced. Due to the excellent transparency and PID-free characteristics of double.

THIN definition: having relatively little extent from one surface or side to the opposite; not thick. See examples of thin used in a sentence.

Scientists at the Korea Institute of Energy Research (KIER) have developed a CIGS solar cell with ultra-thin glass (UTG), an ...

Scientists at the Korea Institute of Energy Research (KIER) have developed a CIGS solar cell with ultra-thin glass (UTG), an emerging substrate known for its exceptional ...

thin adjective (FEW) having only a small number of people or a small amount of something:
