What are the regulations for building a new tower?

Building a new tower or collocating an antenna on an existing structure requires compliance with the Commission's rules for environmental review. These regulatory processes ensure that appropriate measures are taken to protect environmental and historic resources.

Do cell towers need zoning?

Unless the underlying jurisdiction does not require any zoning at all, most cell towers must be approved by the local land use office prior to being built. In some cases, this is as easy as applying for a building permit from the building permit office. Many jurisdictions have created more stringent regulations on the placement of cell towers.

Can a local jurisdiction 'prohibit' the placement of communication towers?

Since the Telecommunications Act of 1996 was enacted in the US, local jurisdictions are not allowed to "prohibit" the placement of communication towers. They are allowed to regulate how and where the towers are placed as long as the overall impact is not to preclude wireless service.

Does building a new tower require environmental review?

Building new towers or collocating antennas on existing structures requires compliance with the Commission's rules for environmental review.

The permitting process might vary depending on your local jurisdiction, but most new cell towers and site improvements must be approved by the local land use office.

As required by the MOBILE NOW Act, GSA created Master Antenna Forms for use by the landholding executives agencies when leasing federal rooftop space and land to ...
