I would like `./configure` to link to a library and some include files. My library is stored in `/home/foo/sw/lib/` and my files are stored in `/home/foo/sw/include`. `./configure --help` throws out ...

To use a proxy, you need a proxy server. The IP and port have to be from this proxy server. Login and pwd must be your user and password on the proxy server (if the proxy ...

3 I would like to configure the ethernet network interface of a server but I am completely lost. I saw on the internet that you could do it with the `nmcli` tool but also with ...

What does `./configure` do? Why make then make install? How does it know where libs are? (they are all there and loaded but it cant find them.) Why need libs if compiler is supposed to compile?

Run the command it tells you to `sudo dpkg --configure -a` and it should be able to correct itself. If it doesn't try running `sudo apt-get install -f` (to fix broken packages) and then try ...

Note that in most cases it would be unusual to specify that many paths as flags; instead, I would expect to find `--with` options to tell the configure script where to find various ...

4 `./configure` runs a script named `"configure"` in the current directory. `make` runs the program `"make"` in your path, and `make install` runs it again with the argument `"install"`. ...

I'm trying to install a Debian package from source (via git). I downloaded the package, changed to the package's directory and ran `./configure` command but it returned ...

When you install software with `make install` or `sudo make install`, different files are placed in different
