What is a 4G & 5G LTE base station?

Covering all common 4G and 5G LTE bands, the base stations feature software-defined radio, allowing great flexibility of operation and future upgrade paths. The CableFree Advanced 4G and 5G LTE SDR (software-defined radio) Small Cell Base Station - Outdoor Version - is suitable for a wide variety of applications.

Where should a 4G adapter be placed?

Suction cups may be used to mount the adapter directly against a window. The adapter should not be placed in a corner, against a wall, or within five feet of a large metal object like a water heater or refrigerator. You can use the signal indicator in the Base Station Setup app to find a good spot with a strong 4G signal.

How do I set up a 4G Connect adapter?

You will start by downloading the Ooma Setup app onto your iOS or Android smartphone: Once you have downloaded and installed the app, open it up and log in using your Ooma phone number or account number and password. Tap the option within the app to configure a 4G Connect Adapter, then use the app to scan the QR code on the bottom of the adapter:

How do I connect a Telo 4G adapter?

The adapter connects to the Telo Base Station or Phone Genie with a standard USB cable. Plug one end of the USB cable into the adapter and the other into the Base Station. You can use the any USB cable up to 15' long. What network does the Telo 4G Adapter use? How do I know if my house has good coverage?
