I'm a beginner trying to use one of my two CB radios as a "base station." The problem is that the power cable is just two wires (no connectors/12v car plug) and a 2A fuse along one.

To connect the Base Station to the power supply system: Connect one mains cable to the power socket on the rear side of the Base Station. Connect one mains cable plug into a suitable wall socket. The ...

Learn how to set up a base-station CB radio at home. From choosing the right power supply to selecting and mounting the ideal antenna for best performance.

I had been using it to power a small 10 watt 2 meter mobile radio for an indoor base station. I have a few 12 volt starting and deep-cycle lead acid batteries lying around.

No, you certainly cannot connect a power station to feed your home along with the grid. The reason it worked for that guy is because he used a microinverter that syncs to the grid.

To get started with your CB radio you will need to hook the CB up to a power supply and an antenna via a length of coaxial cable (see our buying guide page for recommendations for these supplies).

While setting your CB base station up might seem a bit daunting, it's actually a surprisingly simple and straightforward process. Here's how to do it.
