-----

The RTN 360 is Huawei's first full-outdoor V-band device that operates in 59-64 GHz frequency bands (license-free in most areas) and integrates the baseband unit, RF unit, and antenna into ...

One of the most compact outdoor macro base stations in the industry, the BTS3900A features a large, scalable capacity and multi-mode applications that meet the requirements of long ...

Huawei's base stations, such as the DBS5900 and DBS3900, are advanced wireless access devices designed to support various network technologies, including 4G LTE and 5G NR.

Based on LTE technology, the Huawei DBS3900 is the world's leading professional broadband trunking solution. Its advanced features include priority call, call hold, late entry, dynamic ...

Deploy the RRU3938 in challenging environments where reliable connectivity is critical. Its robust design and advanced heat management enable seamless operation in factories, remote base ...

Easy Macro 3.0 is Huawei's latest outdoor 5G site solution. It allows for high-rate wireless networks connecting people and things together in cities. ...

Easy Macro 3.0 is Huawei's latest outdoor 5G site solution. It allows for high-rate wireless networks connecting people and things together in cities. Thanks to the appealing cylindrical ...

One of the most compact outdoor macro base stations in the industry, the ...

Whether you are upgrading an existing network or expanding wireless coverage in rural or urban areas, the base station unit ensures seamless data transmission, reliable coverage, and long ...

Based on LTE technology, the Huawei DBS3900 is the world's leading professional broadband trunking solution. Its advanced features include ...

The DBS5900 BBU5900 (3GPP) Distributed Base Stations is a wireless access device for the eLTE wireless broadband private network solution. It provides wireless access functions, ...

The DBS5900 can meet the needs of industry users for wireless broadband access and multimedia critical communication, and obtain better coverage and user experience. The ...

Meets the requirements for efficient and reliable backhaul from 2G/3G/LTE/5G and 5.5G wireless base stations. Both common-band and E-band provide 10 Gbit/s transmission capacity per ...
