What is the energy port in Gothenburg?

The Energy Port in Gothenburg is Sweden's biggest general energy port and is vital for energy supplies throughout the country.

Does the port of Gothenburg have shore-side power facilities?

The port already has shore power facilities at its Ro-Ro, Ro-Pax, and Energy terminals. Magnus Nordfeldt, Head of Business Area Cargo at the Port of Gothenburg, stated: "This transformer station is an important milestone that brings us significantly closer to shore-side power connection for container and car/RoRo vessels.

How much does the port of Gothenburg project cost?

The total project cost is estimated at around SEK 600 million. The Port of Gothenburg is building a transformer station to enable Onshore Power Supply (OPS) at seven berths by 2030, cutting emissions and meeting future EU regulations.

Will AF Bygg V&#228;st build a transformer station in Gothenburg?

The Port of Gothenburg in Sweden has advanced its sustainability efforts by awarding a contract to AF Bygg V&#228;st, a division of AF Gruppen Sweden, to construct a transformer station for its container and car/RoRo terminals. Valued at approximately EUR 11.4 million, the project is set to begin in Q2 2025 and conclude by March 2027.
