A Japanese chemical manufacturer and construction company have jointly developed "photovoltaic power generation glass" that can be installed on the external walls and windows ...

Nippon Sheet Glass (NSG), Japan's largest glassmaker, plans to show photovoltaic windows developed by its US unit, Ubiquitous Energy, at a train station in Japan.

AGC aims to recycle several thousand tons of solar panels annually by 2030. AGC used 20 tons of recycled cullet in September 2025 for glass production. AGC collaborates with ...

TOKYO -- Nippon Sheet Glass is betting on materials for ultrathin solar panels as it tries to branch out into higher-value products after nearly two decades of weak earnings.

A research group led by Professor Masanori Sakamoto, who studies photochemistry at the Institute of Scientific and Industrial Research at Osaka University, is ...

In March 2025, AGC Inc and ORIX Corporation launched Japan's first horizontal recycling scheme for window glass, marking a significant step forward in the nation's circular ...

AGC and NPC launch a scheme to turn end-of-life solar panel glass into architectural glass, advancing Japan's circular economy.

Nippon Sheet Glass (NSG), Japan's largest glassmaker, plans to show photovoltaic windows developed by its US unit, Ubiquitous ...

Our goal is to achieve glass integrated Perovskite solar cells, which are designed to directly form the photovoltaic layer on the glass substrate, enabling the creation of &quot;power ...
