---

Since officially entering the Japanese market in 2020, Trina Energy Storage has always put product safety first and has fully invested in the R& D and promotion of lithium-ion ...

Gotion said its next-gen 20-foot container BESS system packs 40% more energy and has a 40% smaller footprint compared to a standard 5 MWh system. The new battery ...

Japanese coastal shipping company Imoto Lines and marine software firm Marindows have collaborated on developing a hybrid container ship capable of using exchangeable container ...

Japanese technology company PowerX has unveiled the detailed design of a new cargo ship equipped for storing and transporting surplus electricity generated from renewable ...

Gotion said its next-gen 20-foot container BESS system packs 40% more energy and has a 40% smaller footprint compared to a ...

These container ships will have Japan's first exchangeable or swappable container batteries, onboard storage batteries, generators, ...

The three-year project is aiming to create a vessel with zero emissions over its entire lifecycle by using a range of technologies such as container batteries and other power ...

The container vessel will feature Japan's first exchangeable container batteries, alongside onboard batteries, and generators, and conduct demonstration experiments on the ...

What are the major challenges affecting the growth of the Japan container type battery energy storage systems market? The market faces several challenges that could ...

The container vessel will feature Japan's first exchangeable container batteries, alongside onboard batteries, and generators, and ...

Tokyo, Japan, March 26, 2025 -- Sungrow, a global leading PV inverter and energy storage system provider, has officially announced that its residential energy storage system has ...

The three-year project is aiming to create a vessel with zero emissions over its entire lifecycle by using a range of technologies such ...

These container ships will have Japan's first exchangeable or swappable container batteries, onboard storage batteries, generators, and next-gen systems to enable hybrid and ...

As we head into 2025, hybrid systems combining flow batteries and supercapacitors are stealing the spotlight. One Osaka startup's prototype achieved 99.2% efficiency through multi-layer ...
